

Starter – Magic Trick

Let's see if we can have some fun and pull a rabbit out of a hat.

Part 1

- You are going to make a program
- Open IDLE
- Open up a new window.
- Save the window as Magic Trick.py
- Write the following code into your window.

```
def pullrabbit():
    print("      ^                ")
    print("     /^\ \    ^         ")
    print("    /'  \ \  /^\ \     ")
    print("         \ \ //  \     ")
    print("         \ \ //         ")
    print("         .-' ^ '-.      ")
    print("         .' a__a `.'    ")
    print("         == ( ) ==     ")
    print("         '. _|_ .'      ")
    print("         ___/.'-----'.\___ ")
    print(" [###( )#####( )###]")
    print(" ~~|#####|~~ ")
    print(" |#####| ")
    print(" |#####| ")
    print(" |#####| ")
    print(" |#####| ")
    print(" ~~~~~~ ")
```

```
magicword = input("Enter the magic word: ")
if magicword == "abracadabra":
    pullrabbit()
else:
    print ("That's not a magic word")
```

- Save the code and click execute.
- What does the code do?
