

	<p><b>Story</b></p> <p>This is how to make an animated story. You might also like to create an animation set to a poem.</p>
	<p>RIGHT mouse click on the cat and select 'delete'</p>
	<p>Click on to the Stage icon</p>
	<p>Click on to 'Backgrounds'</p>
	<p>Click on 'Import'</p>
	<p>Locate a suitable background (you may wish to download one from the web, but remember to acknowledge ALL sources!)</p> <p>Click 'ok'</p>
	<p>Click 'Choose new sprite from file'</p>
	<p>Click on to 'Costumes', then locate an appropriate sprite (or draw one yourself)</p>
	<p>Rename your sprite - give it an appropriate name!</p>
	<p>Position the sprite on the stage, and resize it if you need to.</p>

	<p>Choose some music (if appropriate).</p> <p>First, click on the 'stage'...</p>
	<p>...now click 'sounds'</p>
	<p>Click 'import'</p>
	<p>Click on to 'music loops'...</p>
	<p>...then select an appropriate sound. (or locate your own sound...)</p> <p>Click 'ok'</p>
	<p>Click back on to 'scripts'</p>
	<p>Add the blocks as shown.</p>
	<p>Import another sprite...</p> <p>You should know what to do...</p>
	<p>I have imported 'boy2' from the 'people' folder.</p> <p>Make sure you rename each sprite to something meaningful!</p>
<p></p>	<p>The characters are now going to talk to each other.</p>
	<p>Click on to the sprite you want to make talk.</p>
	<p>Add code blocks as shown...</p> <p>Change the 'secs' (seconds) time as appropriate.</p>
	<p>Now click on to the character who will respond.</p>

	<p>Add the blocks as shown.</p> <p>Now we don't want the character to respond straightaway, so make sure you include a 'wait' block too.</p>
	<p>You should then be able to click back on to the ghost and add more blocks like this...</p>
	<p>Clicking back on to Nick...</p>
	<p>You can also add the 'think' blocks too... check it out!</p>

**Now experiment with different backgrounds and sprites.**

**It will help if you write out each line of your story first!**
